INTRODUCTION.

Peakcorp Pty Ltd is a Building and Construction company that has been in operation since 2005.

Peakcorp is industry accredited and insured with a solid reputation for undertaking projects on stringent time lines and delivering a high standard.

Our scope extends across all domestic, commercial, industrial, insurance, remedial, and maintenance sectors across Sydney.

With many years of industry experience, we believe the key to success includes: experience, knowledge, exceptional time and budget management, honesty, integrity and high morals, amongst being flexible and adaptable at all times.

We strive to uphold these values in every project we undertake.

ABOUT US.

Peakcorp has a team of qualified carpenters employed full time which are experienced in the additions and alterations field which ensure quality and compliance of all work carried out.

Our experience allows us to provide alternatives to costly and timely building methods with the use of new age lightweight materials and construction methods. Our builds incorporate new building systems and can utilise modern construction techniques which have proven to be more energy efficient, time-consuming, and faster than conventional older style methods.

Exposing our brand and gaining satisfied clients via completed projects is what we intend will separate us from our competitors.

We pride ourselves on our knowledge and experience to deliver projects with the least possible impact to our clients and their habitable surroundings.

We strive to make the process of delivering projects hassle free for our clients to the best of our ability.

New Residential Builds

Alterations And Additions

Commercial Fit-Outs

First Floor Additions

Granny Flats & Outdoor Structures

Multi-level Unit Developments

New Residential Builds:

Peakcorp’s primary focus is new residential builds. We can deliver the entire turn-key project or lock-up stage (if required).

New builds are generally fast and cost-effective and are built to suit the Australian Standards implemented at the time of construction.

Alterations And Additions:

We can help create fresh, inviting spaces to your family’s home by extending, whether adding another level or extending on ground level. This will help maximise your roof space, height proximity and rear land potential.

Often an extra two bedrooms and bathroom and study upstairs or relocation of the kitchen with an outdoor terrace on the ground floor will reignite the love and practicality of your home.

Commercial Fit-Outs:

Peakcorp has project managed commercial fit-outs/refurbish to many landmark properties across Sydney. Commercial fit-outs are detailed in the finishes and work towards tight time lines for businesses in a hurry to reopen there doors and begin operation.

Critical path time lines must be met and we can assist in the whole process, from de-fits to handover and commissioning.

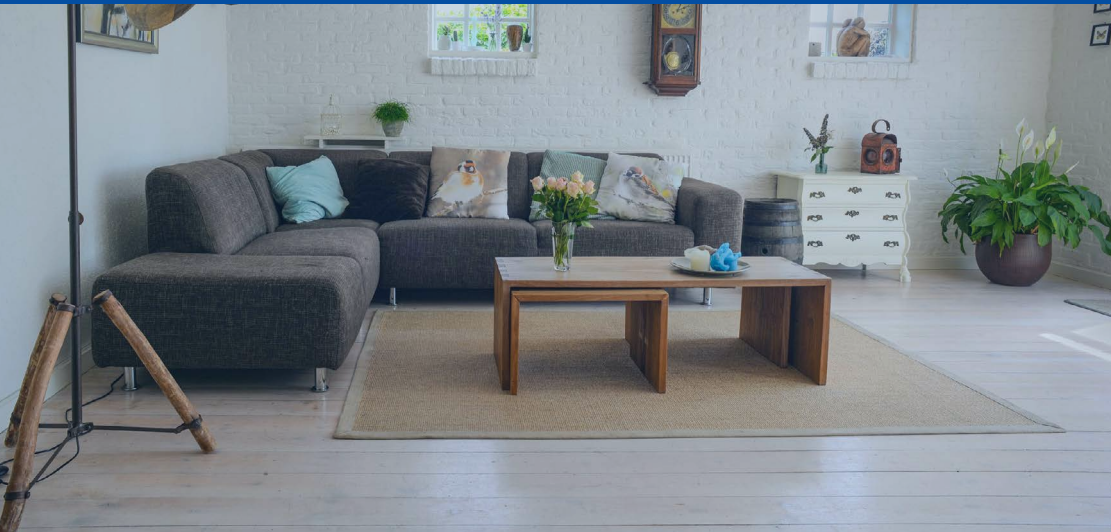

First Floor Additions:

Peakcorp can help utilise dead and unused space in your home; we can convert your roof void into a loft, storage space, office, man cave, viewing room and many more.

Our in-house team of carpenters can convert almost any usable space into something useful that you and your family can begin to enjoy.

Granny Flats And Outdoor Structures:

We can assist in the design and layout to ensure it is practical and energy efficient. This includes existing homes services such as mains meter box to assess which upgrades will be required, also your services such as water, gas and storm water connection points.

Outdoor structures such as carports, garages, studios, home gyms and the like all fall into this category and can be approached in the same manner.

Multi-level Unit Developments:

Peakcorps main forte has been high-end unit developments, focusing mainly on quality and not quantity. We take pride in our work and are often referred to as “the best in the area”.

We utilise new building methods and build in a way that will have the least impact on the surrounding properties, the environment and in a way that will enable your build to run smoothly and on time and budget and meet critical path.

TESTIMONIALS.

"Our office staff have worked alongside the team at Peakcorp and would recommend for your next build. They have the experience to undertake small to large projects."

(LMW Design group - Steve Waters)

"Our office worked alongside Danny on four major projects to date. They are honest, fast and deliver on budget. They can provide large-scale projects to a high standard."

(QPC&C Quantity Surveyors - Elie Awad)

"Danny is a pleasure to deal with. He has the experience and expertise to construct many forms of building types and always ensures the work is compliant without taking any shortcuts. He is a pleasure to deal with and would recommend Peakcorp to others"

(Metropolitan Building Approvals - Camille Haddad)

PROJECTS.

Russell Lea

PROJECT OVERVIEW:

Peakcorp was engaged to build a commercial structure on Lyons Rd Russell Lea that was being turned into a famous crepe shop "Love Crepe".

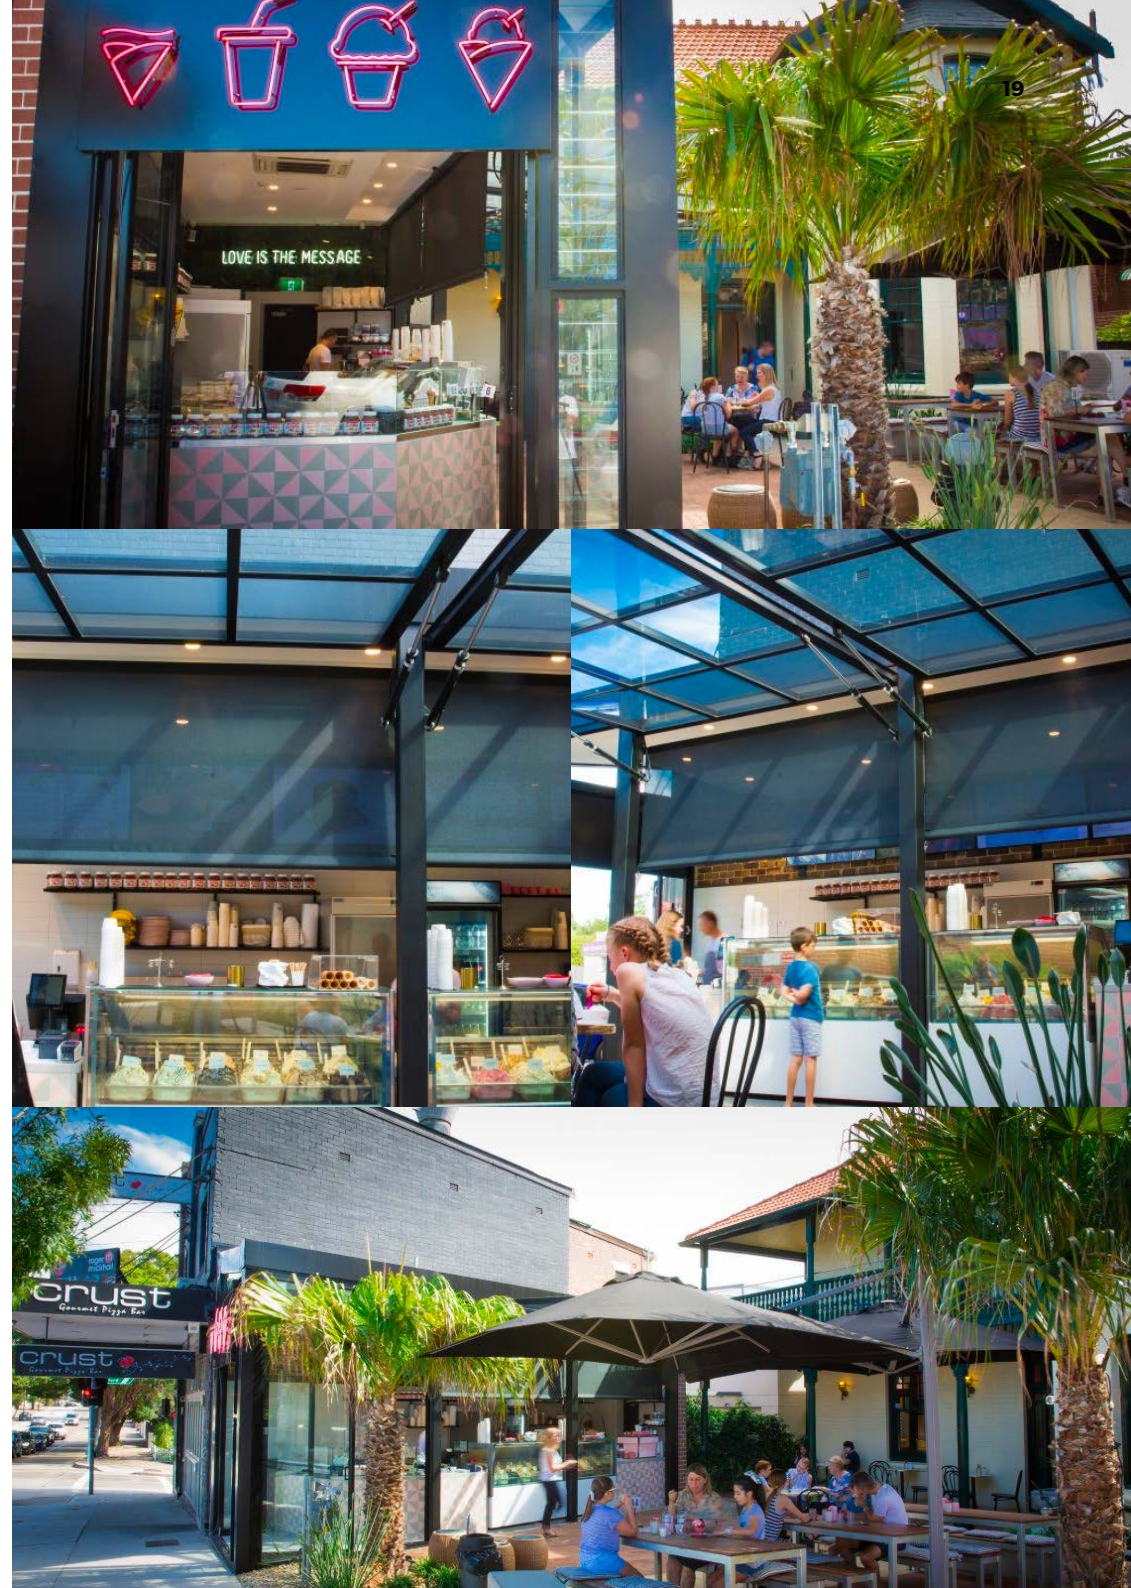

This project included supplying and installing mature palm trees and two hydraulic opening doors that acted as the server.

DETAILS:

Location: 216 Lyons Road, Russell Lea

Project Value: \$250,000

Time frame: 5 weeks

PROJECTS.

Revesby Heights

PROJECT OVERVIEW:

Demolition of a double story squash court and construction of luxury 18 apartments and one commercial space over a single basement. This project comprised of a Lift and a Return Flow central Hot water heating system and electronic metering.

This project was construction managed by Peakcorp and was for a very fussy client who demanded the best and we strive to deliver just that.

The projects basement was excavated mostly in the rock which required saw cutting and we built on the boundary of an existing double level residence only 200mm away.

This project has been the talk of the town and is by far the cleanest build within that area.

DETAILS:

Location: 134-138 Centaour Street, Revesby Heights

Project Value: \$4.56m

Time frame: 14 months

PROJECTS.

Revesby

PROJECT OVERVIEW:

The project included the consolidation of two properties and demolition of two homes including removing mature trees, construction of five large size townhouses each with double garages and four and five bedrooms in each building.

Peakcorp was the head contractor on this project for both building and carpentry framing and fix out.

DETAILS:

Location: 23-25 Montgomery Avenue, Revesby

Project Value: \$2.25m

Time frame: 7.5 months

OUR TEAM.

Danny Amine (Director)

Danny started his career in 2000 as a contract carpenter (Peak Carpentry) and had a team of 4 full-time carpenters which he was driving daily. This experience helped ensure he built his knowledge of the industry and further advanced his studies and went on to complete his Advanced Diploma in Building and was issued an Unrestricted NSW Builders Lic in 2005.

He then formed Peakcorp Pty Ltd which was focusing on building and construction equally as well as contract carpentry. Danny then continued onto contract building and carpentry. As his building business grew he focused more on delivering building projects and in-house carpentry, which consists of framing and fit-outs.

Danny now manages Peakcorp's daily operations and plays a key role in the strategic planning and management of the companys projects.

Given his extensive knowledge and qualifications as a carpenter and builder over the years, Danny has solid insight to plan interpretations, understanding structures, design rectification, cost requirements and time provisions, whilst continuing to grow this knowledge daily.

George Amine (Business Development Manager)

George has been a part of the Peakcorp Family since its establishment. He is a qualified accountant and had previously run his own practice for over 12 years.

In his practice, George managed the affairs of clients in all types of industries and specialises in the construction industry, from business management, accounting and bookkeeping and providing invaluable advice to his client's.

Cooper Lean (Site Supervisor & Qualified Carpenter)

Cooper Lean has been employed by Peakcorp since late 2014 and is a fully qualified Carpenter and Builder.

Cooper is an enthusiastic member of the team and a great team player and enjoys work and the Peakcorp environment. He is a great team player with personal attributes such as honesty, hardworking and caring which optimise's the core values of PeakCorp.
